

Software Development Life Cycle and Application

Names:	Tolentino, Federico III Umali, Aldwyn Josef Yago, Christian Aeriz	Date:	9/26/2026
Program:	CpE106-4/B3 B4		

A. Scenario:

A local organization is looking for a simple system to automate one of its manual processes. Your group must identify a real-world problem and develop a software solution with the system you have picked from the roster.

B. Planning and Requirements Analysis:

System Proposal

Requirements Gathering

- Identify functional and non-functional requirements

Development

- Minimum features
 - Search Function
 - Data Validation
 - User-Friendly Interface

Testing

- Notify your instructor when its time to perform testing.
- Minimum
 - 3 use cases

Challenges and Limitations

C. Submission Requirements:

- Project Documentation (PDF)
- Source Code
- Database
- Selfie

Functional and Non-functional Requirements:

1. Registry Search
2. Graphical User Interface
3. Progress report
4. Payment Methods
5. Unique User Identification
6. Co-Maker
7. Next Due Date

PICTURE/PROOF OF DOING THE ACTIVITY

Software Development Life Cycle and Application

E. Score Sheet

Criteria	Poor (25%)	Fair (50%)	Good (75%)	Excellent (100%)	Score
I. Completeness, Documentation, and Organization of Report	The report was incomplete, messy, and had many unanswered questions.	The report was complete, messy, and had many unanswered questions.	The report was complete, neat, and had 1 or 2 unanswered questions.	The report was complete, neat, and all the questions had been answered.	
II. Coding Design and Patterns	The program had inappropriate elements and structures, incorrect indentation, and poor program documentation.	The program had corrected indentation, but inappropriate elements and structures and poor program documentation.	The program had corrected indentation, adequate program documentation, but inappropriate elements and structures.	The program had appropriate elements and structures, correct indentation, and excellent program documentation.	
III. Findings, Observations, and Comments	The findings, observations, and comments were not based on the gathered data and results. All thoughts were inconsistent and unclear.	The findings, observations, and comments based on the gathered data and results but were not elaborated. Not all thoughts were consistent and clear.	The findings, observations, and comments were based on the gathered data and results and were mostly elaborated. Most of the thoughts were consistent and clear.	The findings, observations, and comments were based on the gathered data and results and were completely elaborated. All the thoughts were consistent and clear.	
IV. Grammar and Composition	The words used were inappropriate, wrong grammar usage, and poor sentence construction was observed.	The words used were appropriate; however, bad grammar and poor sentence construction were observed.	The words used were appropriate, had proper grammar usage, but poor sentence construction was observed.	The words used were appropriate, had proper grammar usage, and excellent sentence construction.
